

# TRANSNET DDPA

## PERFUMED DETERGENT / DISINFECTANT FOOD GRADE

### DESCRIPTION

TRANSNET DDPA is used for cleaning, deodorizing and disinfecting floors and washable surfaces. Non-foaming, its formula allows rapid use without rinsing and according to all application methods : Mop, Wet sweeping, Auto-washer, Spraying. Its powerful and persistent fragrance allows a persistent deodorization of several hours. TRANSNET DDPA is used in solution in water, on all washable surfaces. Its disinfectant formula guarantees daily perfect hygiene of washed surfaces.

#### *BIOCIDAL PRODUCT:*

Active substance per 100g of product: Benzalkonium chloride 1.35g

Group 1: Disinfectants and general biocidal products

Product type 4: Disinfectants for surfaces in contact with food and feed

Complies with standard NF EN 1040 bactericidal in 5 minutes at a concentration of 1%

Complies with standard NF EN 1275 fungicide in 15 minutes at a concentration of 3%

Use biocides safely. Before use, read the label and product information.

### APPLICATION / USER GUIDE

Dilute the product by 1 to 3% in water directly in the household bucket or in the tank of the automatic washer

Use with a mop, sponge, auto-washer.

For effective disinfection, leave the product to act for 15 minutes.

Then rinse with plenty of water.

It is advisable to dilute the product in hot water at a controlled temperature (domestic hot water whose temperature must not exceed 45 ° C) in order to guarantee the effectiveness of all active washing and disinfecting ingredients.

For cleaning and disinfection of surfaces intended to come into occasional contact with food, follow up with rinsing with drinking water.
