

TRANSNET D DEGREASER/DETERGENT

DESCRIPTION

TRANSNET D is a wetting, industrial alkaline degreaser/detergent designed to clean grease, etc. It is applied onto mechanical parts, greasy floors or the inside of fridges. It can also be used to clean chemical tankers and surfaces in contact with food.

TRANSNET D is also effective at removing limescale and its specific composition does not damage aluminium or zinc (it contains an inhibitor designed to preserve these surfaces without damaging them).

This allows the user to apply a smaller amount of product for optimal efficacy.

TRANSNET D is ideal for applications subject to significant agitation (scrubber drier) as it is non-foaming.

APPLICATION/INSTRUCTIONS FOR USE

Contact time: 3 to 5 minutes.

To be used:

- By low-pressure spraying at a concentration of 10% to 20%.
- In a vehicle washing system or roll-over brushes.
- With a scrubber drier.

TRANSNET D is applied at a temperature of 50°C.

Rinse at the end of the washing operation, preferably with hot water.

CHARACTERISTICS

Aspect:Clear liquid
pH (pure product):Not applicable
pH at 10 g/l:12.3 +/- 0.3
Density at 20°C:1.15 +/- 0.01 g/cm³
Freezing point:-6°C
Colour:amber
Biodegradability:>99%

The surface agents used in the design of our products comply with biodegradability criteria as defined in EC regulation No. 648/2004 relating to detergents.

PACKAGING

5 kg
